

HB 145 -- NET METERING AND EASY CONNECTION ACT

SPONSOR: Berry

This bill amends the Net Metering and Easy Connection Act by removing the requirement that a customer-generator have an electrical generating system with a capacity of not more than 100 kilowatts to qualify as a "customer-generator."

The bill further specifies that a customer-generator is intended not to exceed 100% of its own energy requirements with the qualified electric energy generation unit.

The bill specifies changes made to the current credit and billing guidelines.

This bill is similar to HB 481 (2015).
